PROJECTS

Expense Tracker – Full Stack Web Application

- Built a full-stack MERN application for personal finance management, enabling users to track income, expenses, and savings
- Implemented CRUD operations, category-wise expense analysis, and a responsive React.js dashboard backed by a Node.js/Express REST API and MongoDB database
- Designed and integrated RESTful API endpoints connecting the frontend and backend for real-time data updates

Personal Portfolio Website – Front-End Development

- Designed and developed a responsive personal portfolio website using HTML5, CSS3, and JavaScript
- Enhanced user experience with clean UI design and mobile-responsive layout across devices

Calculator Web Application – JavaScript

- Built an interactive calculator application using JavaScript with real-time computation features
- Focused on responsive design, clean UI, and optimized front-end functionality

Mini DSA Implementations – Java

- Implemented core data structures and algorithms in Java, including searching, sorting, linked lists, stacks, and queues
- Strengthened analytical thinking and algorithmic problem-solving abilities relevant to technical interviews
